Where Outdoor Function Meets Interior Elegance

Outdoor living has become an extension of the home, with the same expectations for design, quality and craftsmanship as interior spaces. The **polytec** Alfresco Door Range brings this vision outdoors, offering six distinctive door designs that create a seamless connection between indoor and undercover outdoor cabinetry.

Manufactured with a durable aluminium frame and 5mm Compact Laminate insert, the range is engineered for long-term performance in undercover outdoor environments. From minimalist flat panels to framed, V-groove and shaker inpired profiles, each design combines architectural style with practical durability, giving designers, cabinet makers and homeowners more choice when creating outdoor kitchens and entertaining spaces.

Applications

- Undercover outdoor kitchens
- BBQ cabinetry
- Alfresco bars and entertaining areas
- Undercover outdoor storage cabinets
- Pool houses and pavilions
- Residential and commercial alfresco spaces

Features and Benefits

- Backed by a 7-year limited warranty
- Durable aluminium frame construction
- 5mm Compact Laminate inserts with exceptional weather resistance
- Impervious to water
- Outstanding stain, wear and impact resistance
- Easy to clean and low maintenance
- Designed to complement interior **polytec** cabinetry
- Made to order in Australia

Five Alfresco Door Designs Reimagined for Life Outdoors

Our Alfresco range just got bigger. Five new designs bring more choice to create outdoor spaces that feel as considered as the rest of your home.

Harvest **Alfresco** Door in Manor Oak Woodmatt.

Flat

A clean, flat panel that features a smooth, versatile surface for both bold and neutral outdoor designs where the finish takes the centre stage.

Frontier

Frontier features a 20mm V-groove routed border with square corners, creating a strong, defined frame that adds structure and subtle depth to cabinetry.

Harvest

Architectural style defined by evenly spaced 60mm V-grooves. Introduces vertical flow, delivering a panelled look that enhances modern outdoor spaces.

Arque

Arque features a V-groove routed 20mm border paired with smooth 20mm radius corners, offering a refined, rounded aesthetic that softens the overall look while maintaining structure.

Reveal

A premium design including a front panel with a 60mm V-cut border and a secondary inset panel positioned behind, slightly smaller in both height and width.

Arbor

A premium constructed design with front panel 60mm V-cut border with 20mm radius corners is complemented by a slightly smaller inset panel positioned behind, creating a layered, framed effect.

Environment & Sustainability

polytec is a 100% Australian family-owned brand and for over 30 years, we have taken pride in being an Australian manufacturer, with sustainability ingrained in the core of our operations, products, and work practices, shifting towards continual dedication to improving and enhancing our environmental performance. This involves a steadfast reduction of our carbon footprint, minimising waste, optimising energy efficiency, and integrating ethically sourced materials into our product ranges.

Our MDF and Particleboard are manufactured from managed and renewable plantation pine that has been Green Tag, Responsible Wood and PEFC certified. All **polytec** board products are manufactured from E0 or E1 substrates, with particleboard now made from a percentage of recycled wood material.

The reDirect Recycling Wood Recovery Initiative services **polytec** customers by collecting raw and melamine coated particleboard offcuts for reuse. These materials are diverted from landfill and repurposed into new particleboard within our closed loop manufacturing processes, reducing waste and preserving valuable plantation resources.

polytec is striving to reduce carbon emissions by installing solar panels throughout all sites nationwide. Since 2018, over 46,000 solar panels across the network of facilities have been installed. When installed, the Oberon facility was Australia's largest rooftop solar system with over 27,000 solar panels over eight hectares.

polytec is on a journey – one that places sustainability at the centre of how we design, manufacture, and support our customers. We believe that sustainable practices are the foundation of strong, resilient communities – and we're committed to contributing to a healthier, more sustainable future for all.

Care & Maintenance

polytec Aluminium framed doors are manufactured from the highest quality materials and designed to provide years of trouble free service. Whilst your doors are made from the highest quality anodised aluminium extrusion, care should be taken to wipe up spills immediately.

The surface of **polytec**'s Compact laminate is made from a stain-resistant melamine based resin. The toughness and high impermeability of this surface means that **polytec**'s Compact laminate should require no more than wiping with a soft cloth, dampened with plain water or a mild household detergent mix to remove all common household spills. **polytec** Alfresco doors should always be installed in an undercover application and should not be exposed to direct sunlight or consistent environmental forces that could affect the product.

polytec doors should be cleaned by wiping down with a damp soft cloth and warm soapy water. Followed by drying using a soft or microfibre cloth so as not to leave any residue on the door or panel For more stubborn stains use a mild household cleaning spray. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful kitchen surface for many years.

Visit **polytec**.com.au for specific care and cleaning information. Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

Important

Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit **polytec**.com.au.

polytec swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit **polytec**.com.au.

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
