VISTA DOORS

RANGE

polytec.com.au

Designed to Be Noticed. Because Details Matter.

polytec's Vista doors are a contemporary five-piece door defined by precise mitred construction, delivering depth, structure and clarity through considered design.

Developed and manufactured in Australia, Vista introduces a contemporary sharp-edged profile to the **polytec** portfolio. Engineered using advanced manufacturing processes, it combines architectural precision with the warmth of a multi-piece door, creating a modern interpretation of a classic form.

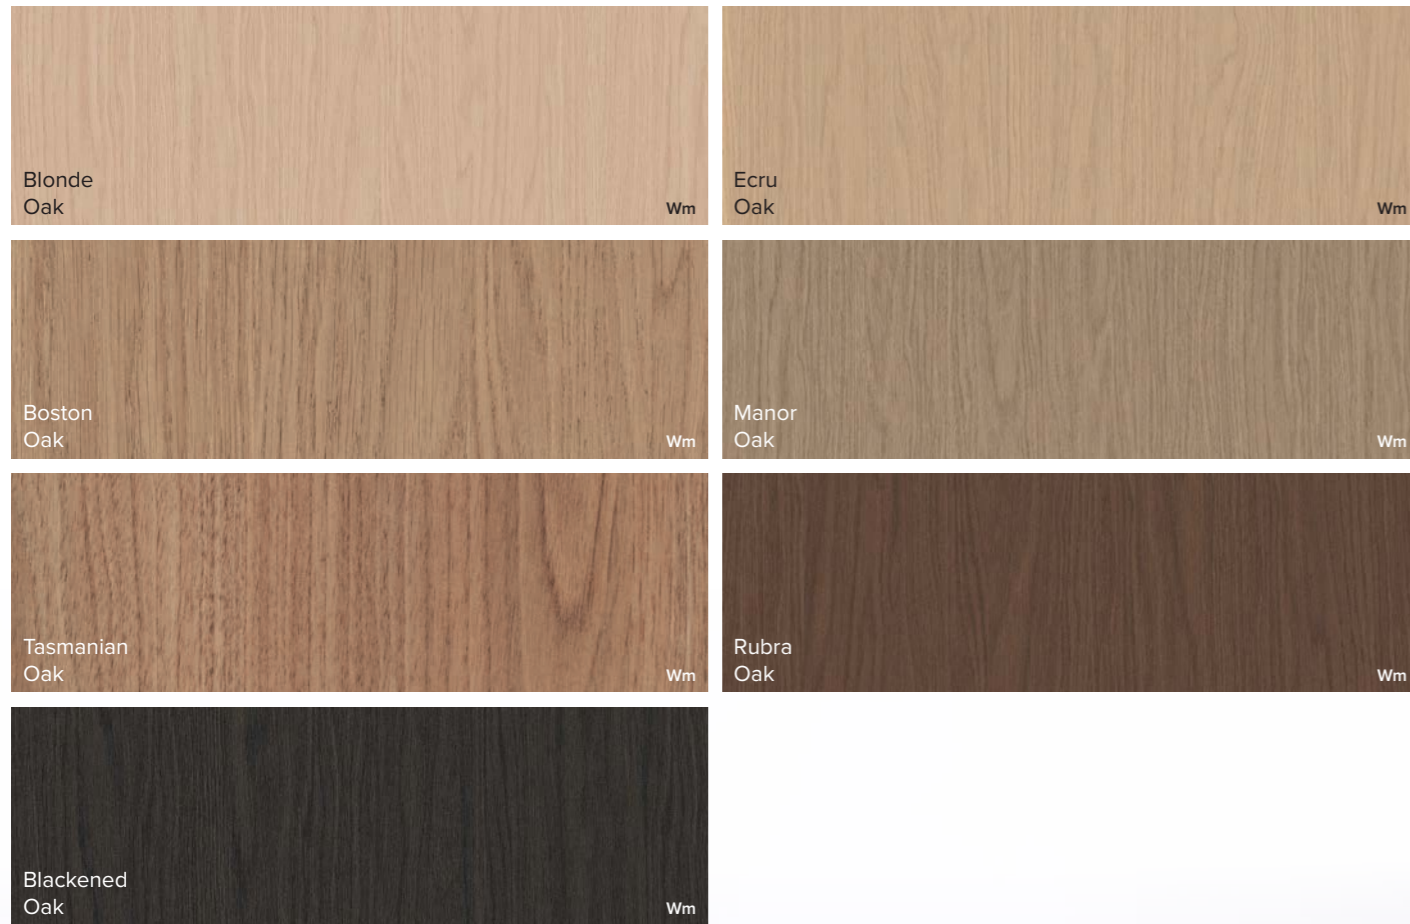

Responding to a growing demand for a sharper, more architectural multi-piece door, Vista delivers a premium aesthetic without the premium price. Vista doors offer durability, design flexibility and the ability to introduce subtle or striking contrast detailing.

Vista doors can be specified with a matching frame and insert for a seamless, unified appearance, or paired with a contrasting insert to highlight the frame and add visual depth. This flexibility allows designers to create either a subtle, cohesive aesthetic or a more defined feature within a space.

- Made to order product
- Vista doors are 21mm thick
- A multipiece door featuring a 20mm wide frame and a 16mm decorative insert panel
- Seven frame options from our popular Woodmatt® finish
- Maximum size 2900mm high by 1200mm wide

Crafted with world-class machinery and refined assembly processes, Vista doors achieve the balance of a handcrafted look with engineered precision.

20mm Frame Options

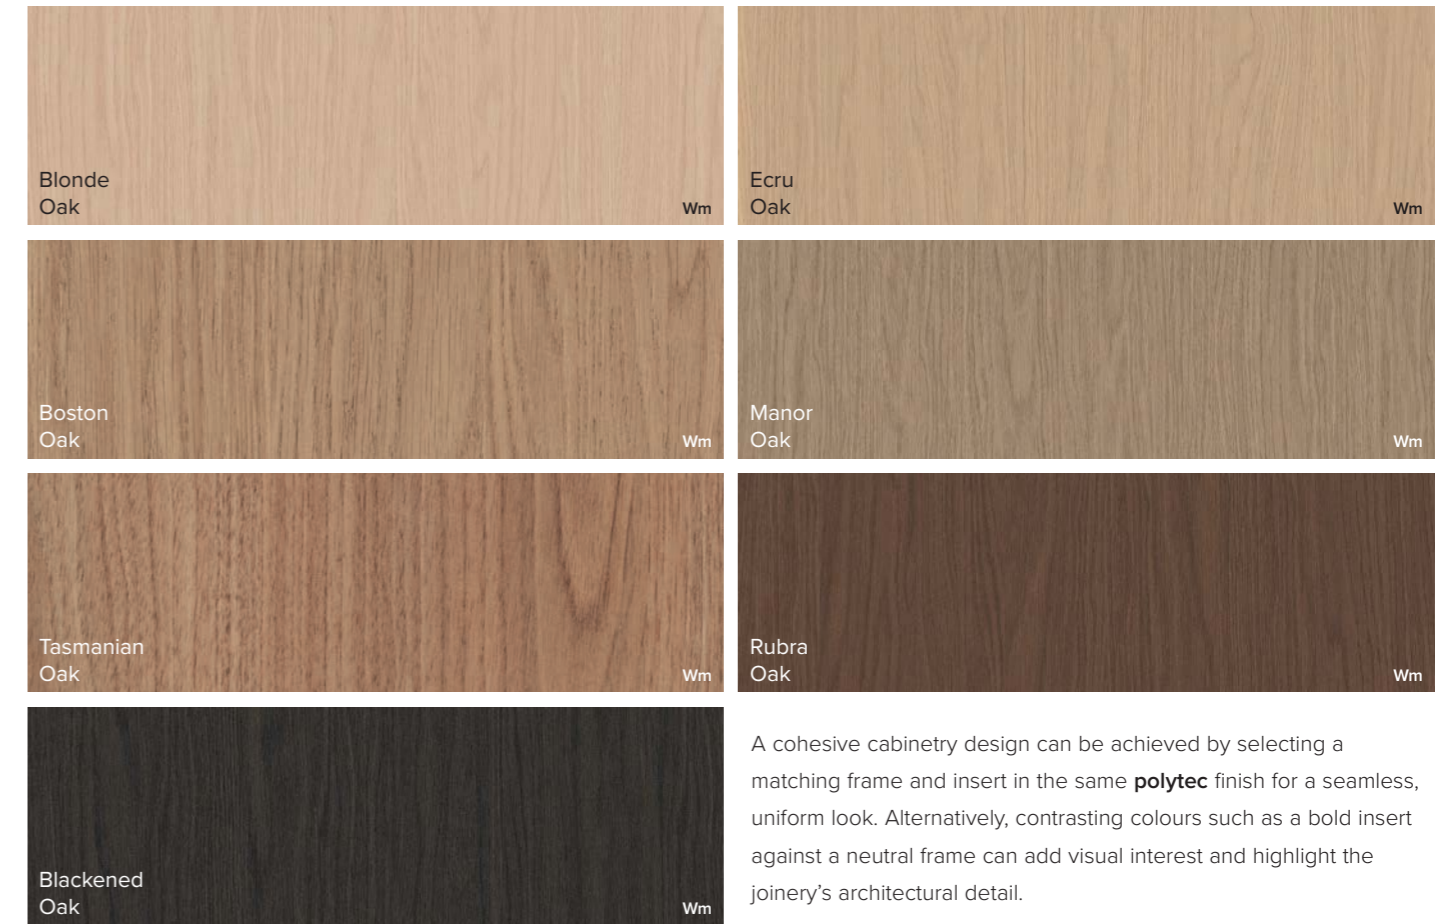

Available finishes **M** = Matt **Wm** = Woodmatt

polytec swatches and samples represent a small area of the overall colour structure. To view the large colour sample, visit polytec.com.au.

Dark coloured surfaces will show fingerprints and require more care and maintenance than lighter coloured surfaces. **polytec** recommends testing a product sample prior to colour selection.

From left to right: Rubra Oak frame with matching insert, Blonde Oak frame with matching insert, Ecrú Oak frame with Blossom White Insert, Boston Oak frame with Batten Oak insert. The chosen insert colour carries through to the reverse side of the door, ensuring a consistent finish. Batten Oak insert comes with a Boston Oak rear backing.

Insert Option / Matching

A cohesive cabinetry design can be achieved by selecting a matching frame and insert in the same **polytec** finish for a seamless, uniform look. Alternatively, contrasting colours such as a bold insert against a neutral frame can add visual interest and highlight the joinery's architectural detail.

Insert Options / Contrasting

Ecrú Oak™

Complementary Ranges

polytec products are designed to work seamlessly together, offering cohesive and adaptable interior solutions. Consistent colours, finishes, and textures allow for easy mixing and matching while maintaining a unified look, simplifying design across residential and commercial spaces.

Note: Vista doors are only available with full rails and cannot be grain matched.
