# Introducing Bronze to Aluminium Framed Doors

2 Product Release | Aluminium Doors – Bronze Frame & Bronze Glass Inserts

Aluminium 42mm Bronze Frame with Bronze Glass insert. **Decorative** doors & panels in Manor Oak Woodmatt.

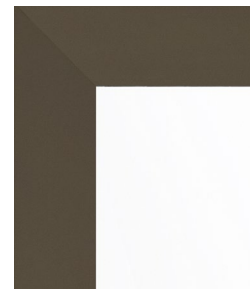

[polytec.com.au](https://polytec.com.au)

# A warmer direction for Aluminium Door Frames.

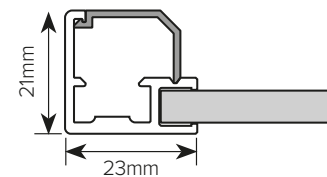

**polytec**'s Bronze Frame provides a warmer alternative to the existing Brushed Grey and Brushed Black anodised aluminium frame finishes.

Its rich metallic character works particularly well alongside warm timber tones, brass hardware, stone surfaces and layered material palettes.

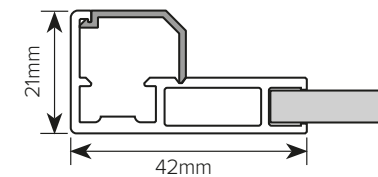

Available in both 23mm and 42mm frame profiles, Bronze provides an additional way to bring definition to kitchens, bars, display cabinetry and feature joinery.

**23mm Bronze Frame**

**42mm Bronze Frame**

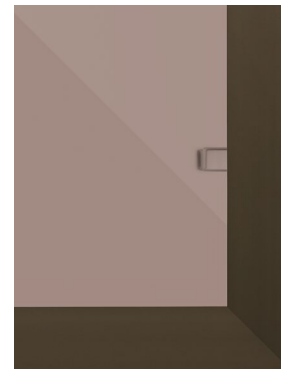

# More ways to create with Bronze Glass.

---

The introduction of Bronze Glass and Vintage Bronze Fluted Glass brings a warmer, more expressive direction to the **polytec** Aluminium Framed Doors range.

Bronze Glass offers subtle transparency with added tonal depth, while Vintage Bronze Fluted Glass combines warmth with a directional fluted surface, introducing texture, visual depth and increased privacy.

Both options create additional opportunities to layer warm tones throughout kitchens, bars, display cabinetry, wardrobes and feature joinery, complementing timbergrains, stone surfaces and metallic accents.

## **Bronze**

Introduces a warm tinted transparency, maintaining visibility.

## **Vintage Bronze Fluted**

Combines a warm bronze tint with linear fluted texture.

## 5 Product Release | Aluminium Doors – Bronze Frame & Bronze Glass Inserts

**Aluminium** 42mm Bronze Frame with Frosted Glass insert (left) and  
**Aluminium** 23mm Brushed Black Frame with Bronze Glass insert (right).
