New Travertine-Inspired Colours  
Benchtops & Laminate

[polytec.com.au](https://polytec.com.au)

Inspired by natural travertine stone.

# Ivorio Travertine™ & Beige Travertine™

---

## Key Features

Soft, linear travertine movement	Excellent versatility across vertical and horizontal applications
Warm neutral undertones suited to modern and classic interiors	Available in full, half long, half short and quarter sheets
Subtle stone variation for an authentic architectural feel	All profiles within the Made To Order (MTO) Benchtop range

Ivorio Travertine and Beige Travertine bring the enduring beauty of natural stone into a refined laminate surface, designed for contemporary interiors that feel warm, grounded and effortlessly considered. Inspired by the soft linear movement and tonal variation of classic travertine, each décor captures the quiet luxury of sun-warmed limestone with a practical, versatile finish suited to benchtops, cabinetry, vertical applications and layered joinery schemes.

Ivorio Travertine offers a lighter, more luminous interpretation, with creamy ivory tones and subtle sand undertones that create softness without feeling stark. Beige Travertine delivers a deeper, more grounded expression, pairing rich neutral warmth with gentle caramel notes and authentic stone detail. Together, these new colours support the shift toward natural, textural interiors, offering makers and creators a timeless surface solution with depth, composure and everyday durability.

# Contemporary surfaces with timeless warmth.

Smooth

A light, luminous interpretation of classic travertine, Ivorio Travertine brings a soft ivory base to life with warm sand undertones and delicate linear movement. Its subtle porous detailing and gentle tonal variation create a surface that feels calm, refined and architectural, offering the natural texture of stone without visual heaviness. Elegant and understated, it is ideal for interiors seeking softness, light and quiet sophistication.

# Beige Travertine

Smooth

Richer and more grounded, Beige Travertine captures the warmth and depth of natural limestone with a layered beige base, soft caramel undertones and authentic travertine movement. Its organic banding and delicate stone detailing add dimension while maintaining a composed, tonal finish. Confident yet restrained, it brings warmth, tactility and timeless character to contemporary interiors.
