Designed to Be Noticed.
Because Details Matter.

Architectural definition you can see.

Key Features | Vista Doors

21mm multi-piece construction with 16mm insert	Made-to-order with flexible sizing options
Available in a curated range of Woodmatt® finishes	Minimum Size: 120mm high by 297mm wide
Suitable for standard hinge applications	Maximum Size: 2900mm high by 1200mm wide

polytec is excited to introduce Vista Doors, a refined addition to its multi-piece door portfolio.

Vista is a 21mm thick, five-piece door featuring a precisely mitred frame construction with a 16mm insert panel. The centre insert is made from 16mm MDF MR E0, ensuring compatibility with the extensive 16mm decorative range and offering flexibility across a wide selection of finishes.

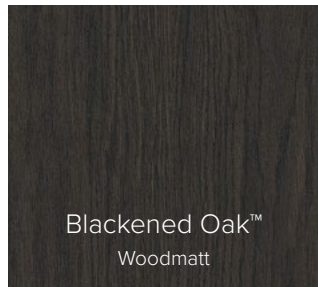

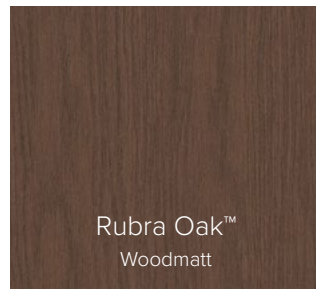

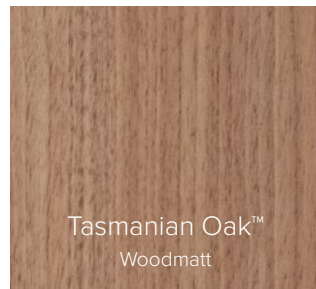

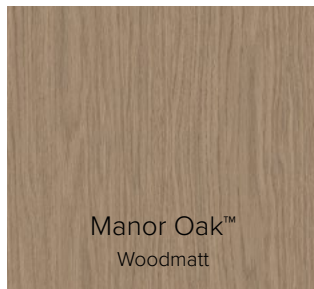

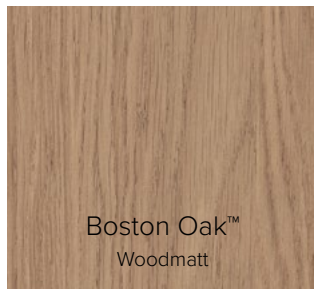

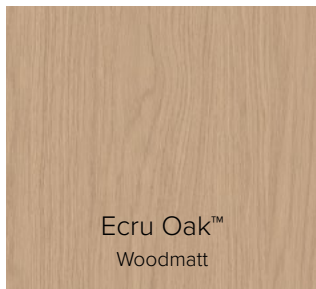

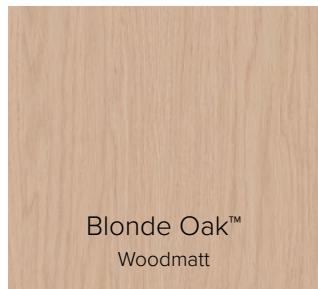

Developed and manufactured in Australia, Vista delivers clean internal corner detailing and a more defined, contemporary aesthetic. The design also allows for contrast between frame and insert, giving designers and homeowners greater creative freedom.

Supplied as a made-to-order product with standard hinge compatibility, Vista integrates seamlessly into existing cabinetry applications and sits alongside Surano within the **polytec** multi-piece door range.

Vista Doors are only available with full 20mm rails. Grain matching is not available.

Contrast capability for design flexibility.

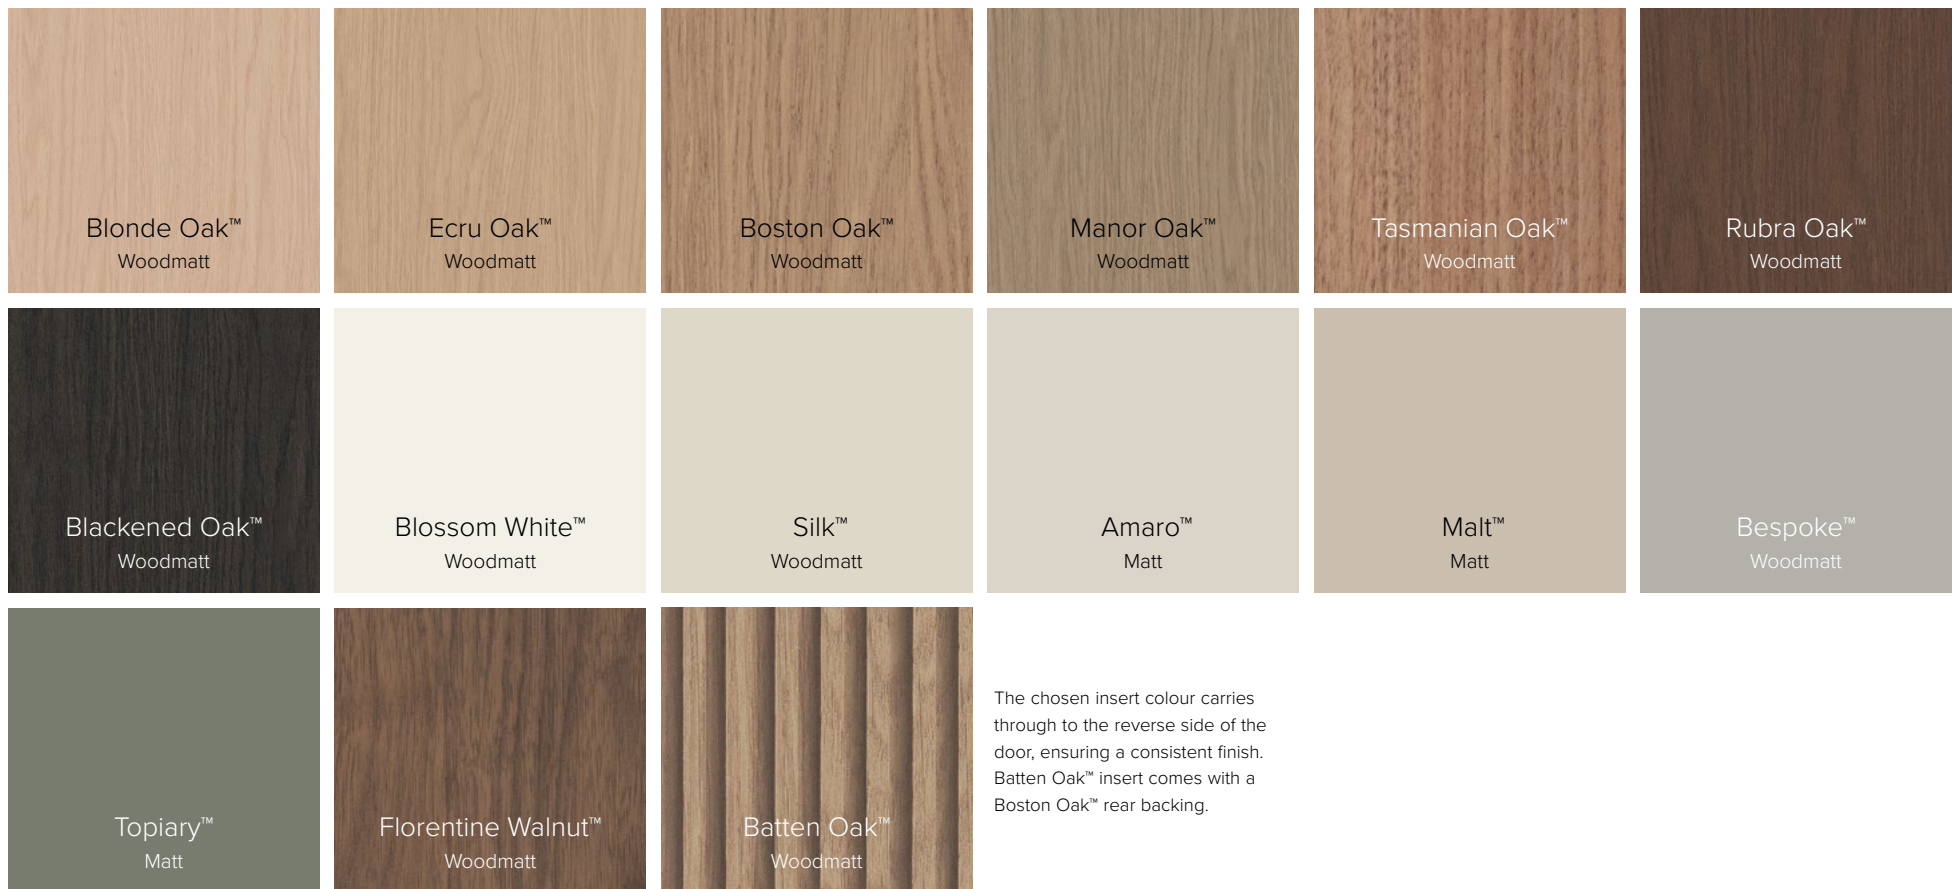

20mm Frame Options | Colours in Collection

Contrast capability for design flexibility.

A cohesive cabinetry design can be achieved by selecting a matching frame and insert in the same **polytec** finish for a seamless, uniform look. Alternatively, contrasting colours such as a bold insert against a neutral frame can add visual interest and highlight the joinery's architectural detail.

16mm Insert Options | Colours in Collection

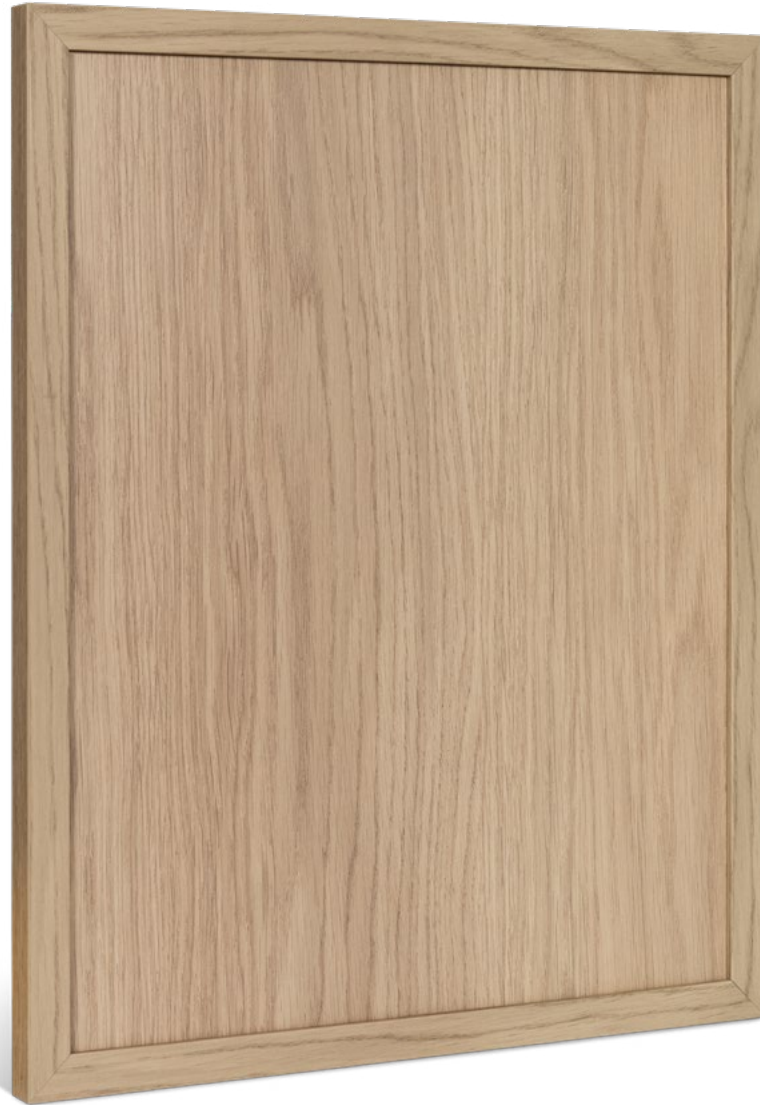

Colour | Vista Doors

Blonde Oak™

Woodmatt

Matching frame and insert.

A pale creamy undertone with a slight reddish tinge in a solid oak woodgrain with subtle crown cuts.

Colour | Vista Doors

Ecrú Oak™

Woodmatt

Matching frame and insert.

A beige coloured undertone with grey grain in a solid oak woodgrain with subtle crown cuts.

Colour | Vista Doors

Boston Oak™

Woodmatt

Matching frame and insert.

A true tan-brown natural solid oak
woodgrain with crown cuts.

Colour | Vista Doors

Manor Oak™

Woodmatt

Matching frame and insert.

A mid brown-beige undertone with slightly deeper brown grain in a solid oak woodgrain with subtle crown cuts.

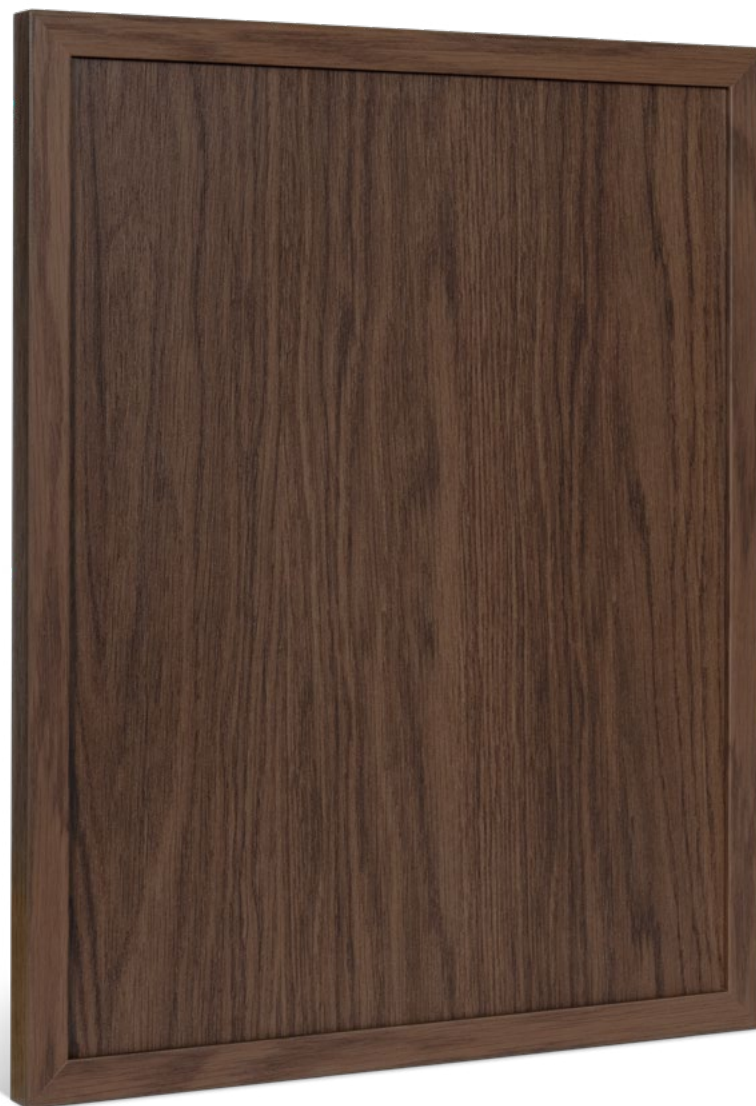

Colour | Vista Doors

Tasmanian Oak™

Woodmatt

Matching frame and insert.

A warm, natural red, yellow and brown based, realistic Tasmanian Oak™ colour and timber structure, with subtle straight planking and half crown cuts throughout.

Colour | Vista Doors

Rubra Oak™

Woodmatt

Matching frame and insert.

A deep red-brown undertone with dark brown grain in a solid oak woodgrain with subtle crown cuts.

Colour | Vista Doors

Blackened Oak™

Woodmatt

Matching frame and insert.

A near-black undertone with darker
black grain in solid oak woodgrain
with subtle crown cuts.

Endless contrast, elevated design.

With 105 possible combinations, contrasting insert and frame pairings open up a world of expressive design opportunities.

Pairing a light insert with a darker frame creates a striking sense of depth and definition, drawing the eye to the detail of the joinery while adding warmth and sophistication. Alternatively, reversing the palette with a darker insert framed by a lighter tone delivers a refined, contemporary aesthetic that feels balanced yet bold. Each combination allows you to shape the mood of the space, from soft and understated to dramatic and architectural.

This level of flexibility invites you to design with intention. Whether you're creating subtle contrast or a statement feature, mixing tones within the same **polytec** palette ensures cohesion while still achieving visual impact. The interplay between light and dark enhances texture, emphasises craftsmanship, and brings cabinetry to life, transforming it from a functional element into a defining feature of the space.
